

SAK Wood
South Asia Kraft Wood

Products Price-List 2025

Luxury Tropical Hardwoods

At SAK Wood, we specialize in sourcing and distributing premium hardwoods. We start with the finest Asian hardwood species. Next, only the best of this wood is selected. Each chosen piece is then expertly crafted to product perfection. By finish, our materials are exceptional inside and out: boasting unmatched quality and impressively long-term performance.

With a centuries-long regional history of expertise for teak wood of unrivaled caliber, we proudly offer "Northern Thai Teak". This is an exclusive and rare hardwood, with a strictly limited supply, making it more precious than other teak to source. Add this treasured wood to your home or business and endow your project with the living legacy of greatness.

Superior Quality from the Northern Highlands

Key Features & Advantages:

- **Premium Quality from Mature Trees:** Our products are crafted from carefully selected logs, 60 to 80 cm in diameter, grown slowly in the ideal climate and fertile soil of Northern Thailand. This causes rich, dense teak wood with golden hues and the distinctive, elegant grain patterns unique to this renowned region.
- **Expert Processing:** Producing premium Thai teak demands expert craftsmanship. Each piece is chosen by grade, kiln-dried, and finished by skilled craftsmen who refine every detail to the highest standards. The result is timber that reflects the wood's natural beauty and craft expertise that has been honed through generations of mastery.
- **Lifetime Guarantee:** We are so confident in the enduring quality of the wood, proven in architectural heritage sites like the 158 year old Ancient House Chiangmai, that we offer a lifetime guarantee on our flooring products, to grant you peace of mind in the lasting value of your investment.

SAK Wood

15 × 140 mm 	450, 600 mm	18 600 ₱	SQM
	900 mm	21 800 ₱	SQM
	1 200 mm	22 800 ₱	SQM

A Legacy of Tangible Beauty

Our teak parquet is the foundation of a luxurious interior. Its added value lies in its substantial thickness, a mark of heirloom quality proven by time, as seen in historic landmarks like the magnificent Mrigadayavan Palace, built from the same teak over a century ago.

Greater thickness gives the floor an outstanding refinishing lifespan, allowing the surface to be restored numerous times. This ensures your real wood floors can always be returned to their original splendor and passed down through generations. Furthermore, its four-sided interlocking system offers the creative freedom to design complex and unique installation patterns.

TEAK FLOORING BOARDS, T&G

Classic Look, Proven Strength

Our floorboards are the embodiment of the classic design style. Long and gorgeous wood planks create an expansive look and the visual effect of flow and space. They feature a robust two-sided tongue-and-groove system engineered for enduring stability.

The legendary strength of teak comes from deep within. It contains natural compounds, scientifically proven to provide powerful resistance against pests and termites, making it one of the most durable hardwoods in the world.

Moisture Content	14-18%
Finishing	Unfinished

Your Private Sanctuary, Built to Endure

Our decking is built to face the elements. Its key feature is a remarkable fortitude against weather and the freeze-thaw cycles of winter, a quality unmatched by lesser woods.

The secret lies in teak's high concentration of natural oils. These oils actively repel moisture to prevent swelling and rot, ensuring your decking remains safe and stable for years.

Over time, teak decking can be left to weather naturally to a sophisticated silver-grey patina or easily maintained to preserve its original luster.
(Note: This last sentence could be omitted.)

The Signature of Architectural Elegance

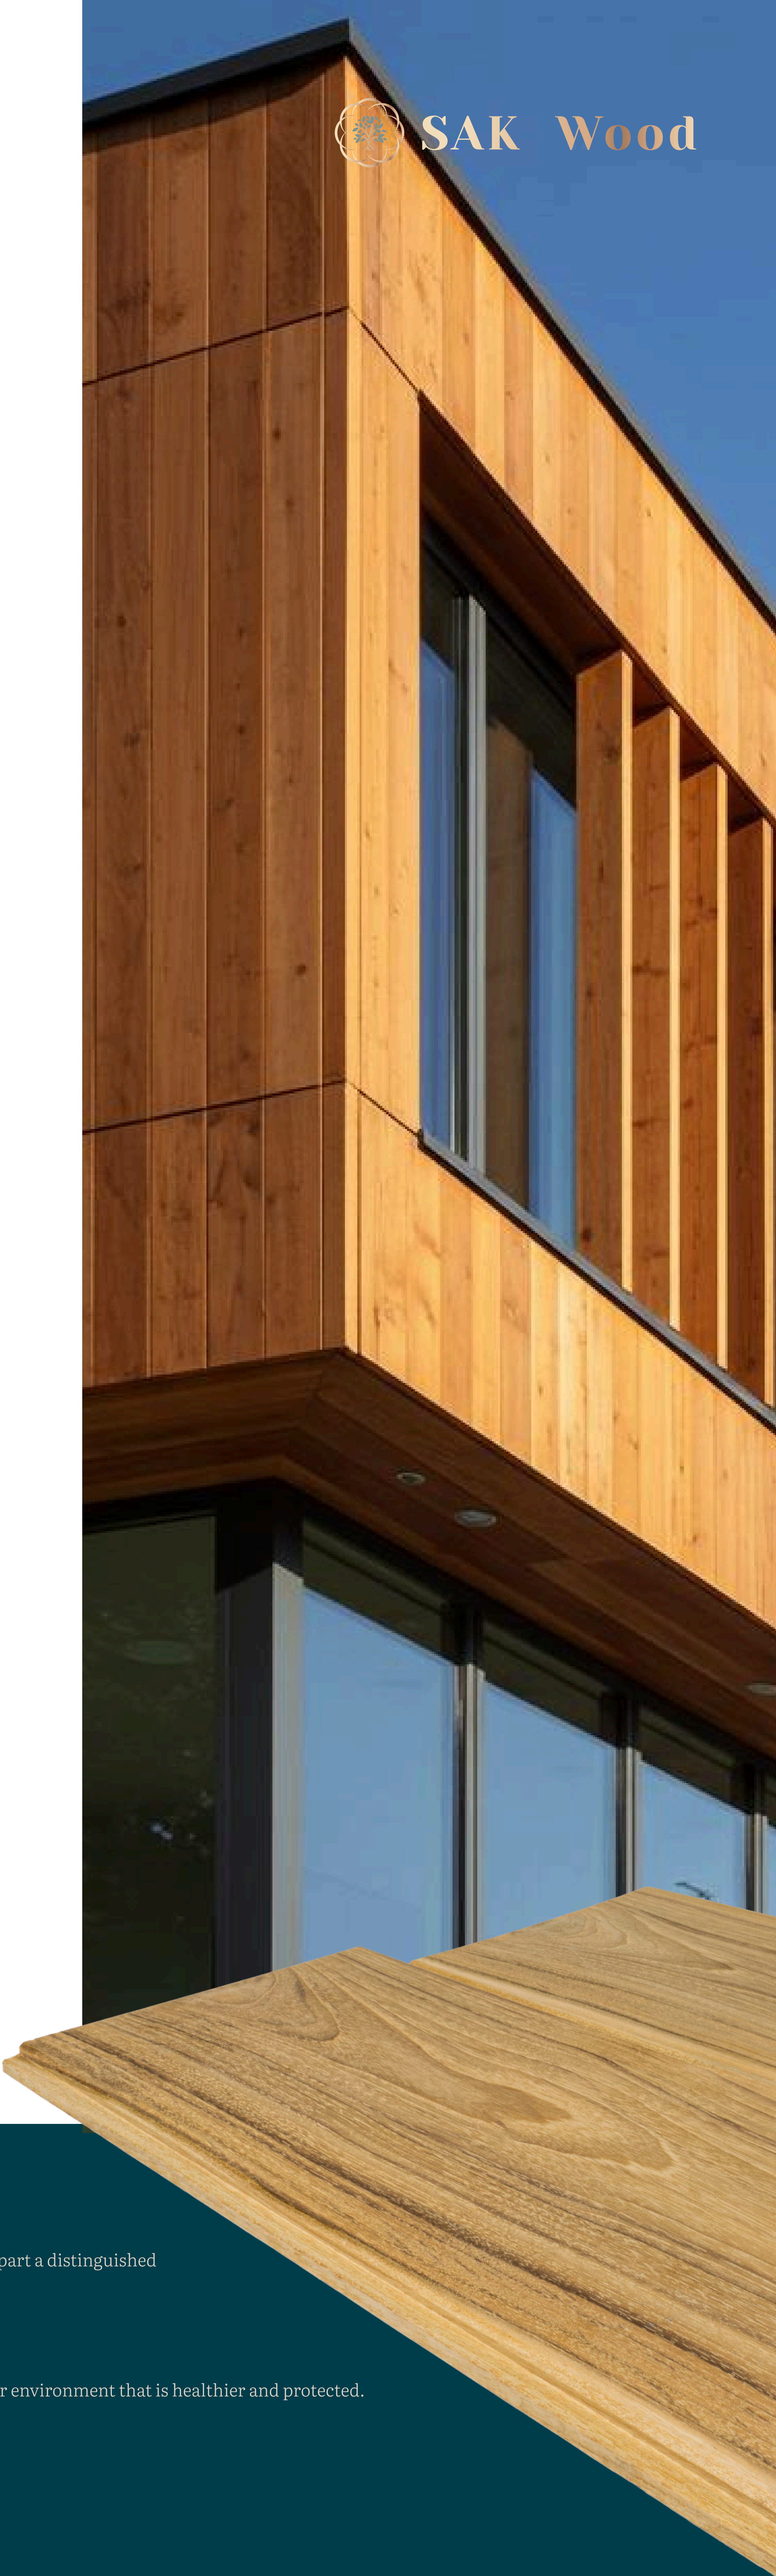

Our cladding serves as a beautiful and grand exterior for any home or business. The attractive grain and warm tones impart a distinguished character, transforming a simple structure into an architectural gem.

A defining feature is the role of real wood cladding as a "living shield," that regulates humidity within, creating an indoor environment that is healthier and protected.

For an investment in beauty that comes with superior functional benefits, there is SAK Wood teak cladding.

SAK Wood

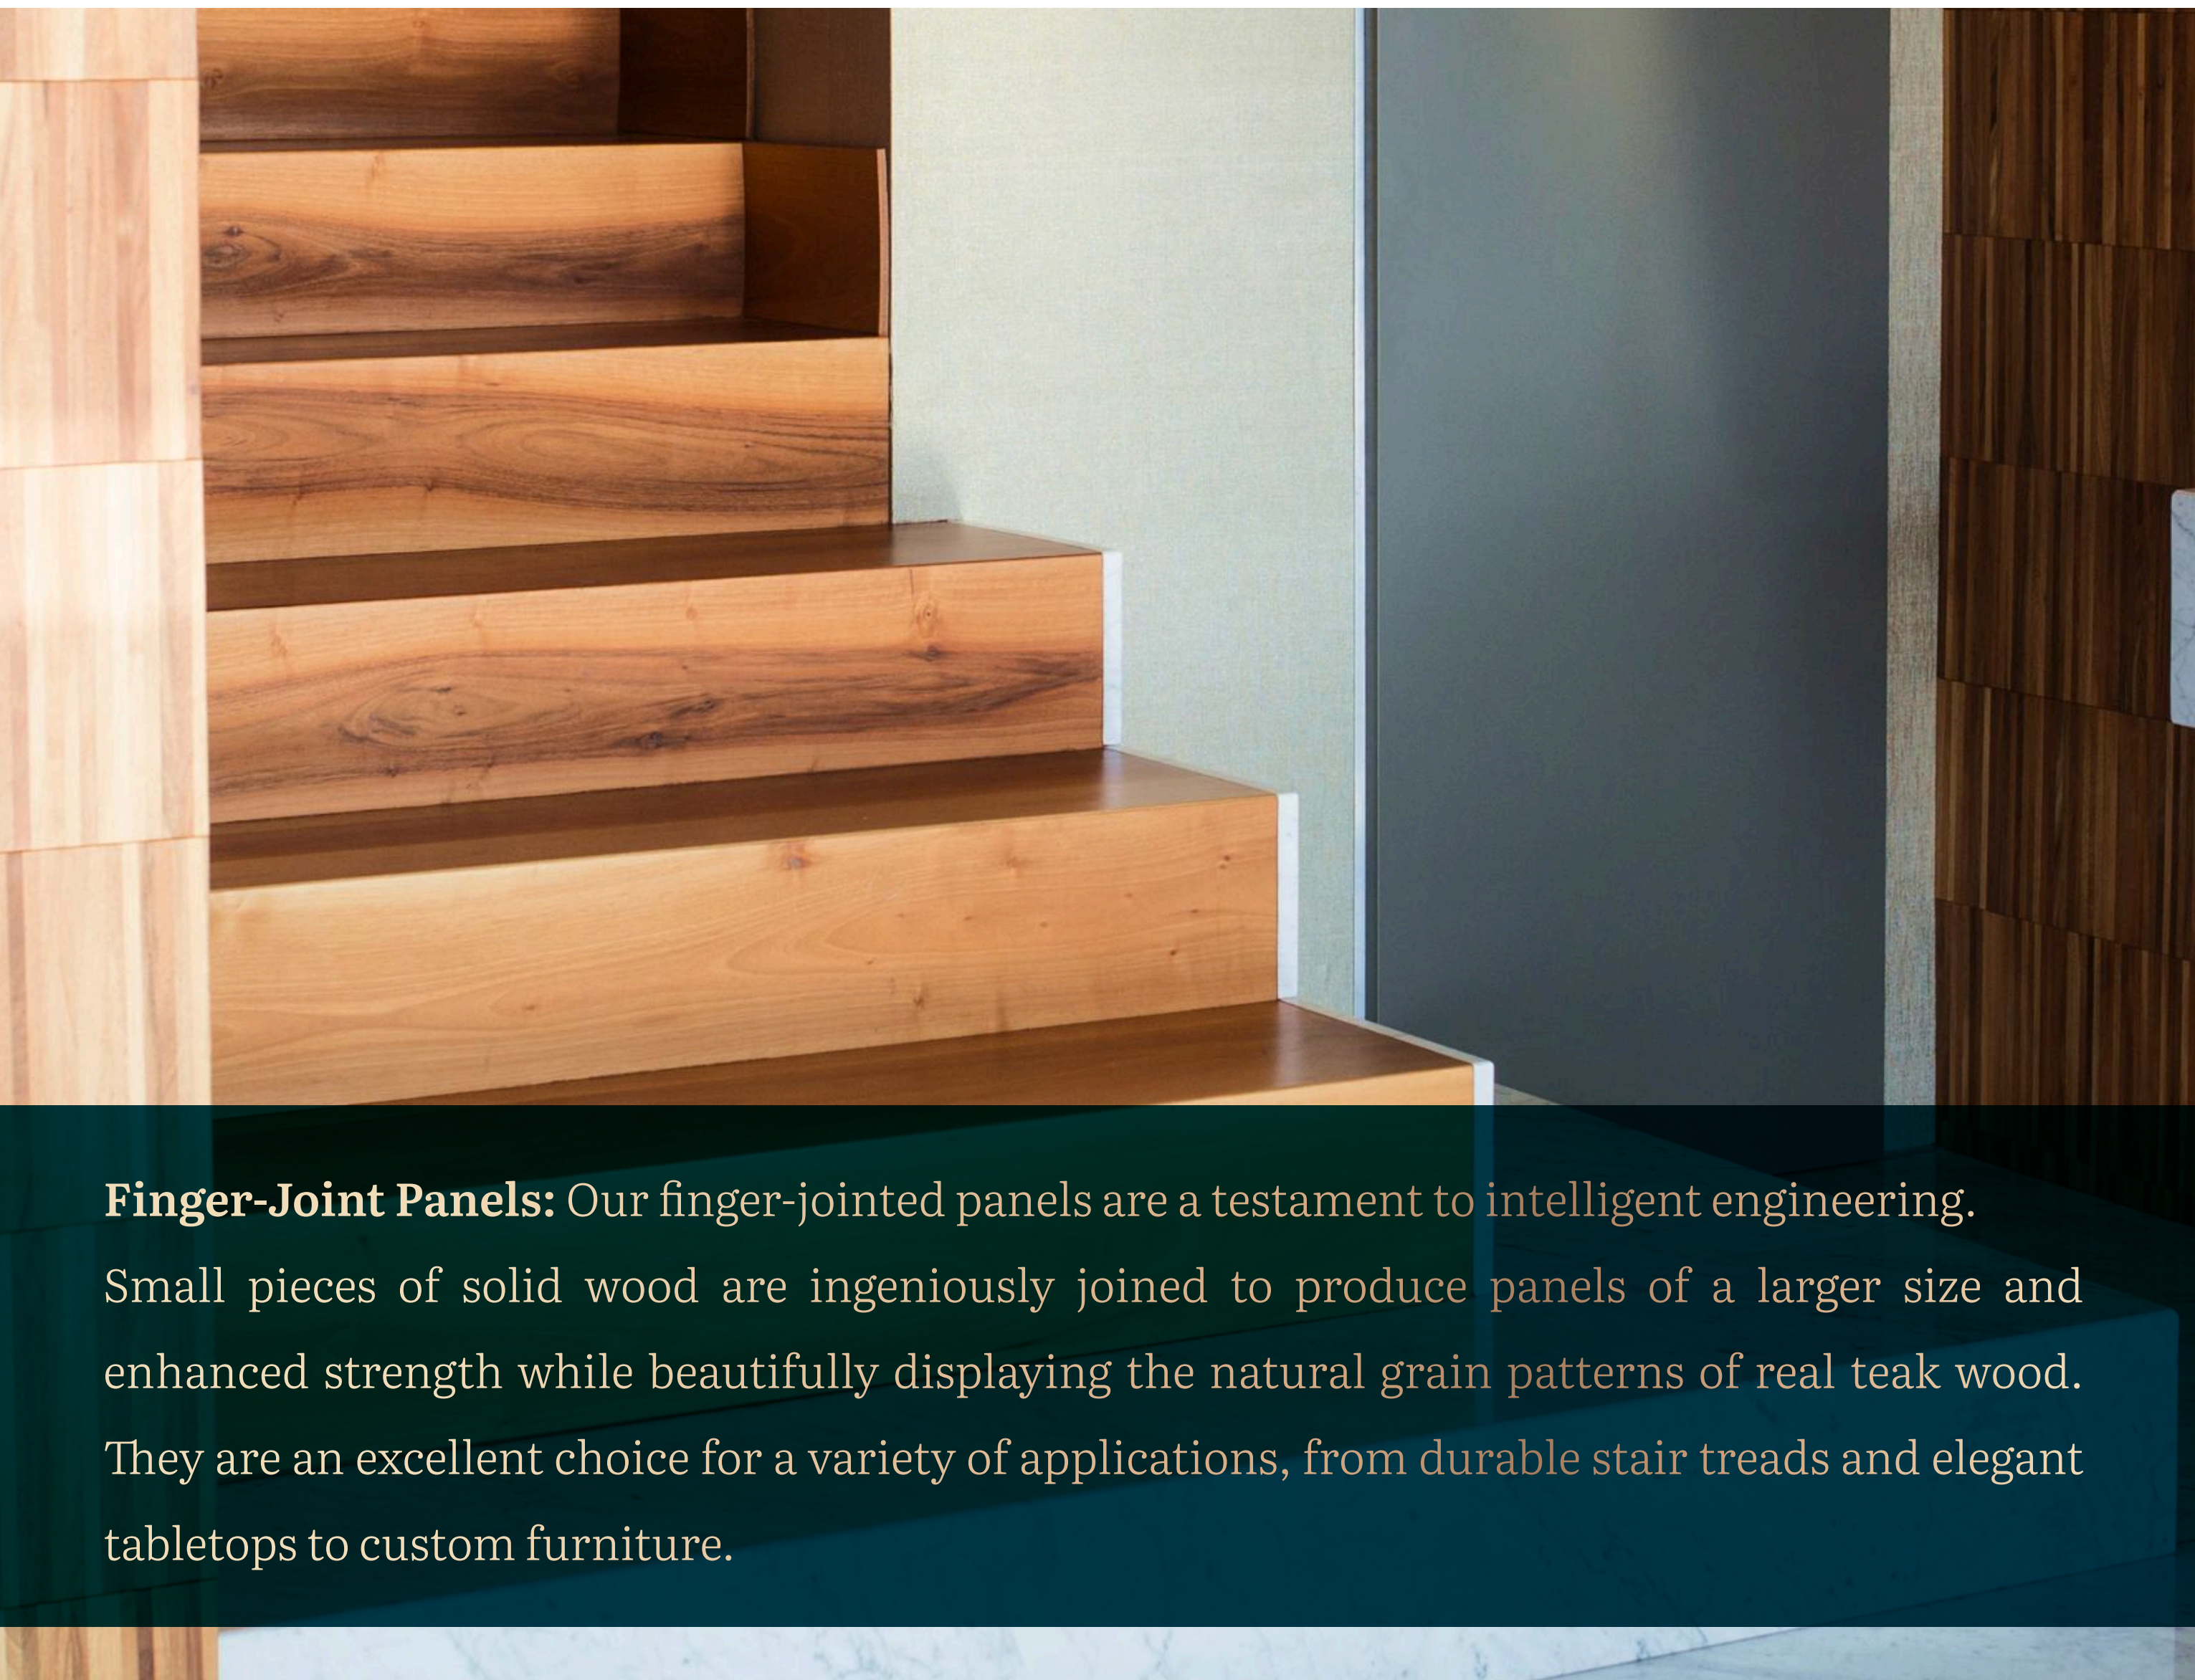

Kiln-Dried & S4S Timber: For architects and customers who demand the finest materials, we offer our Northern Thai Teak as dimensioned timber. Available Kiln-Dried for stability and Surfaced-on-Four-Sides (S4S) for immediate use, this premium, mature-log wood provides a superb foundation for custom furniture and architectural details.

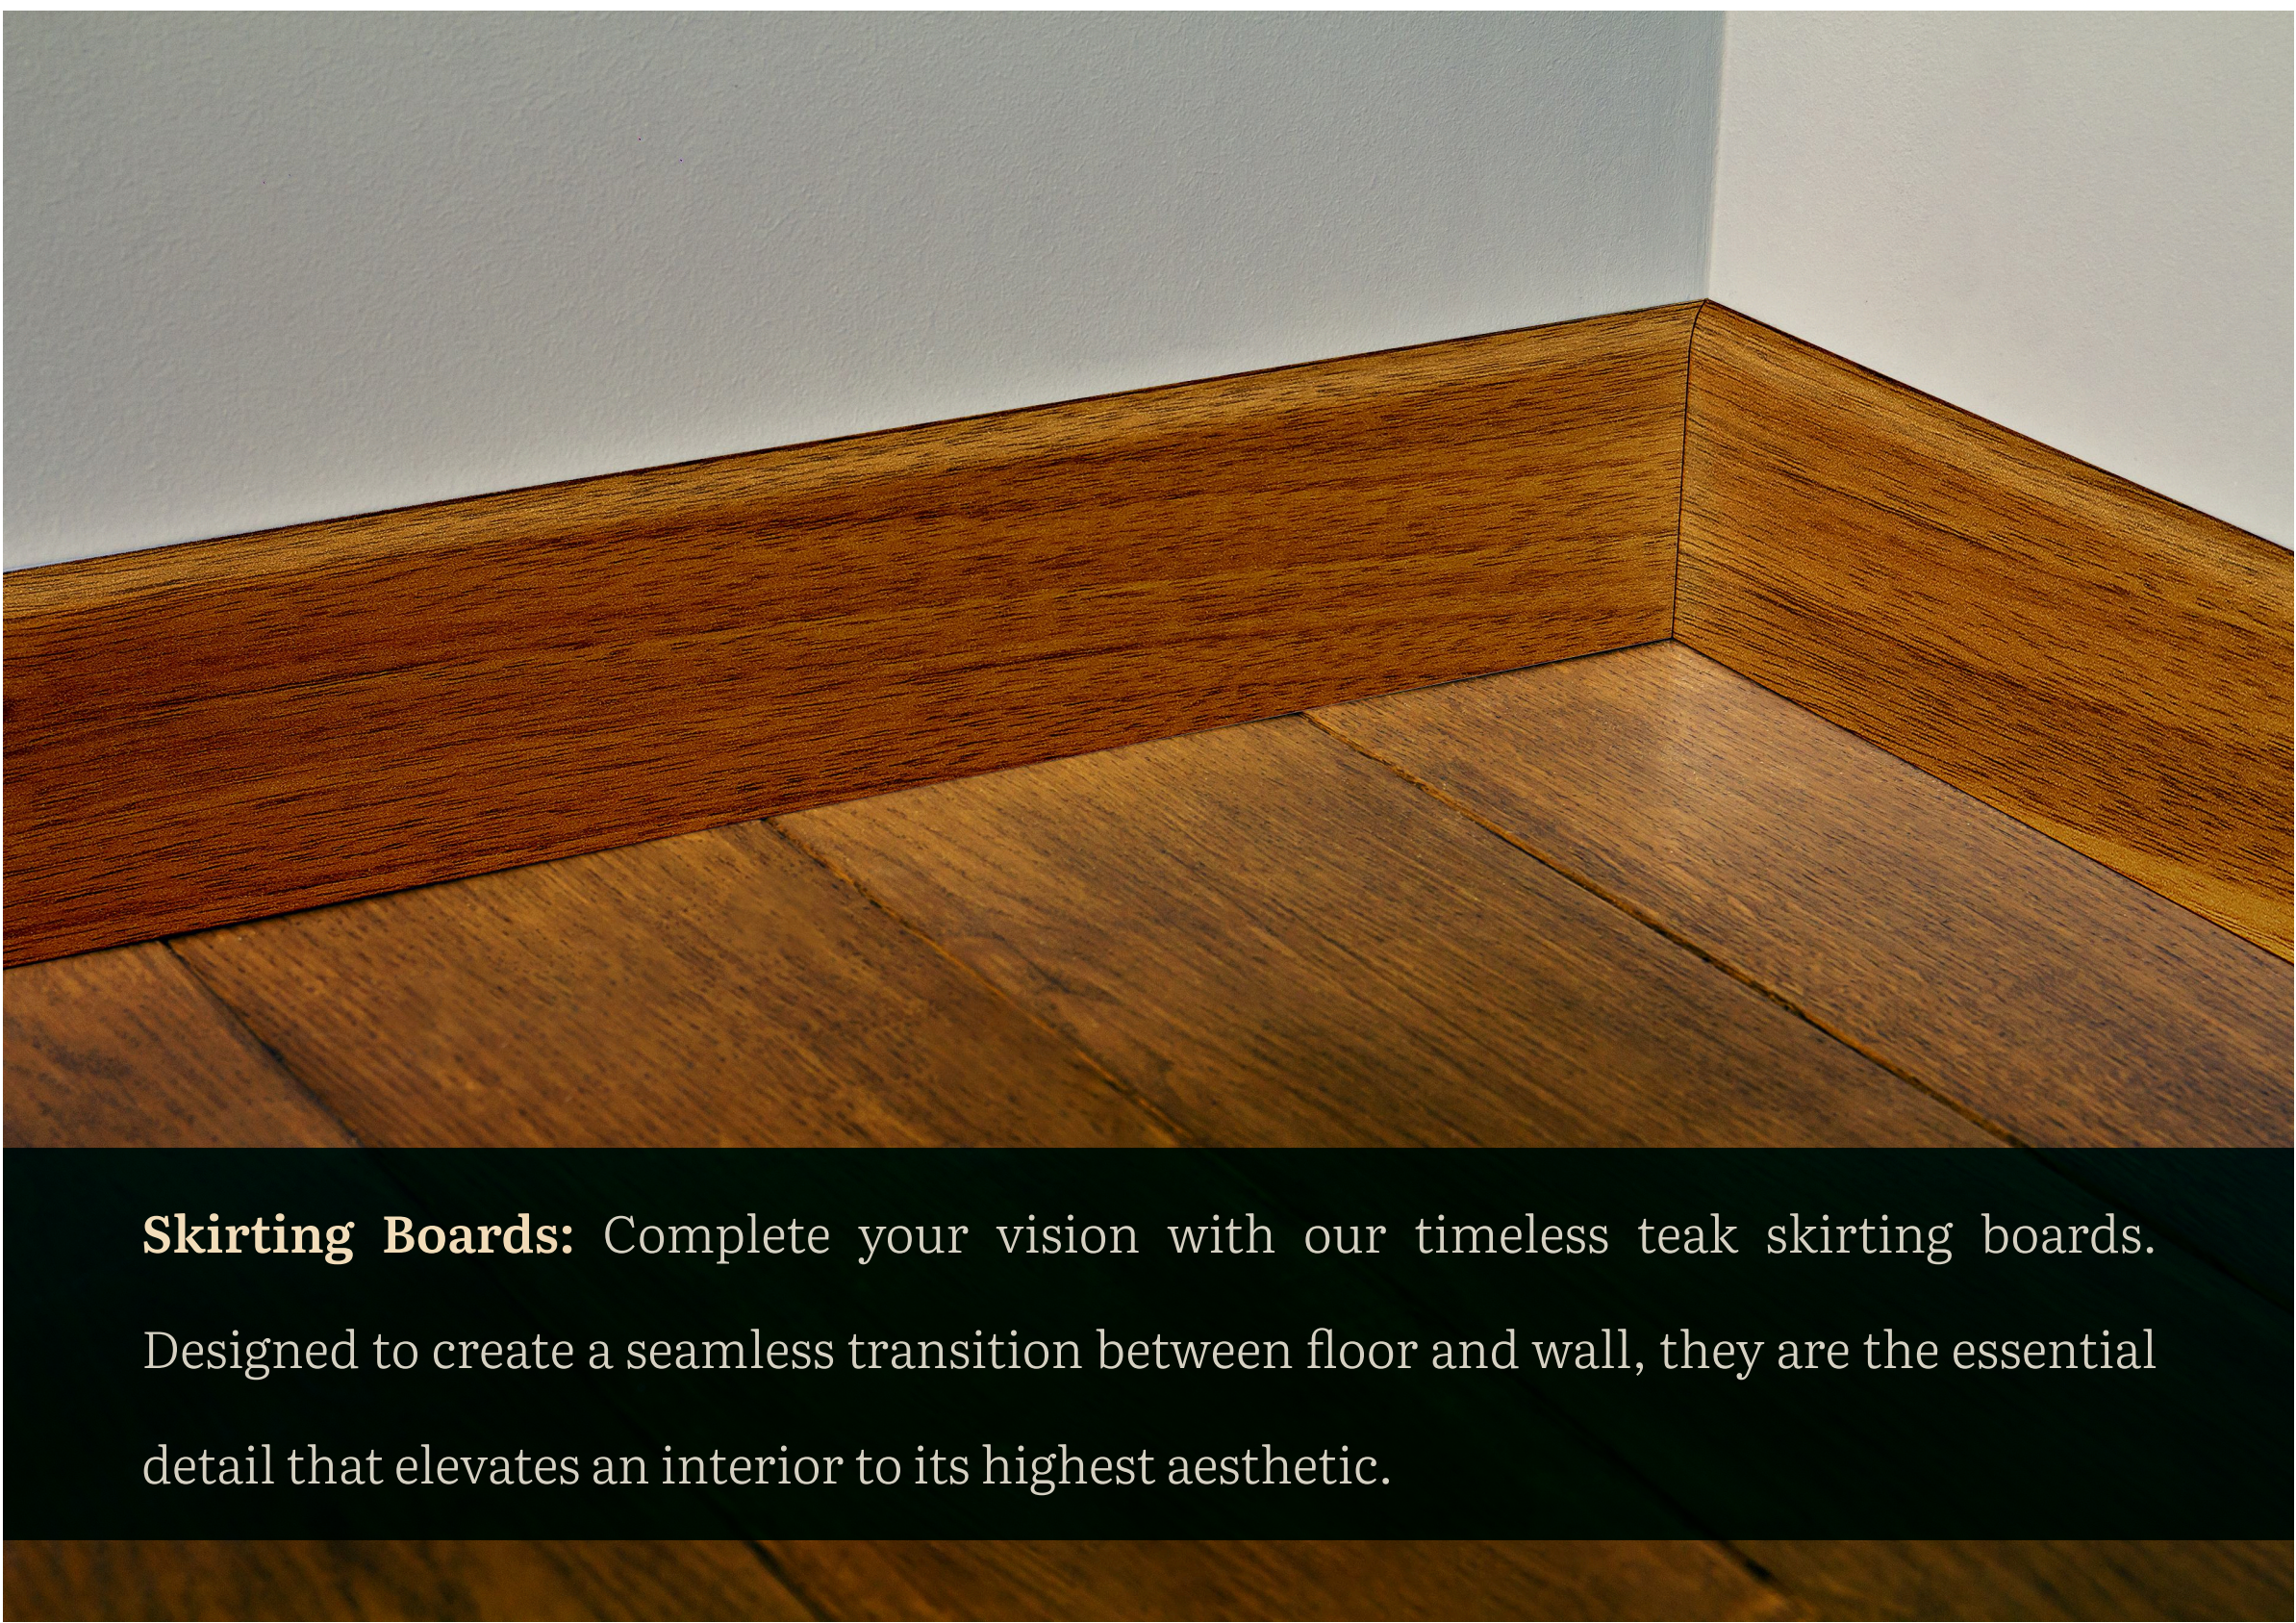

TEAK TIMBER

THE PERFECT COMPONENTS FOR EVERY DETAIL

Finger-Joint Panels: Our finger-jointed panels are a testament to intelligent engineering. Small pieces of solid wood are ingeniously joined to produce panels of a larger size and enhanced strength while beautifully displaying the natural grain patterns of real teak wood. They are an excellent choice for a variety of applications, from durable stair treads and elegant tabletops to custom furniture.

Skirting Boards: Complete your vision with our timeless teak skirting boards. Designed to create a seamless transition between floor and wall, they are the essential detail that elevates an interior to its highest aesthetic.

Made-to-Order Showcase & Inspiration

Your Vision, Crafted by Our Hands

For architectural projects that are one-of-a-kind, we offer a bespoke service dedicated to bringing your unique vision to life.

Extraordinary design often requires specifications that go beyond the standard. At SAK Wood, we go above and beyond so that the success of your projects will likewise surpass all expectations.

With a team of experts and direct connections to the factory in Thailand, we produce custom teak components tailored precisely to your stipulations.

Our Collaborative Process:

- **Consultation:** We begin with a detailed discussion to fully understand your project requirements, specifications, and aesthetic goals.
- **Proposal & Specification Review:** Our team will provide a comprehensive proposal outlining the final specifications for your review and approval.
- **Craftsmanship & Production:** Upon confirmation, your custom order is sent to our historic factory in Thailand, where skilled artisans begin the meticulous production process.
- **Global Logistics & Delivery:** We manage the entire logistics chain, from the factory to our warehouse, and coordinate the final delivery to your project site.

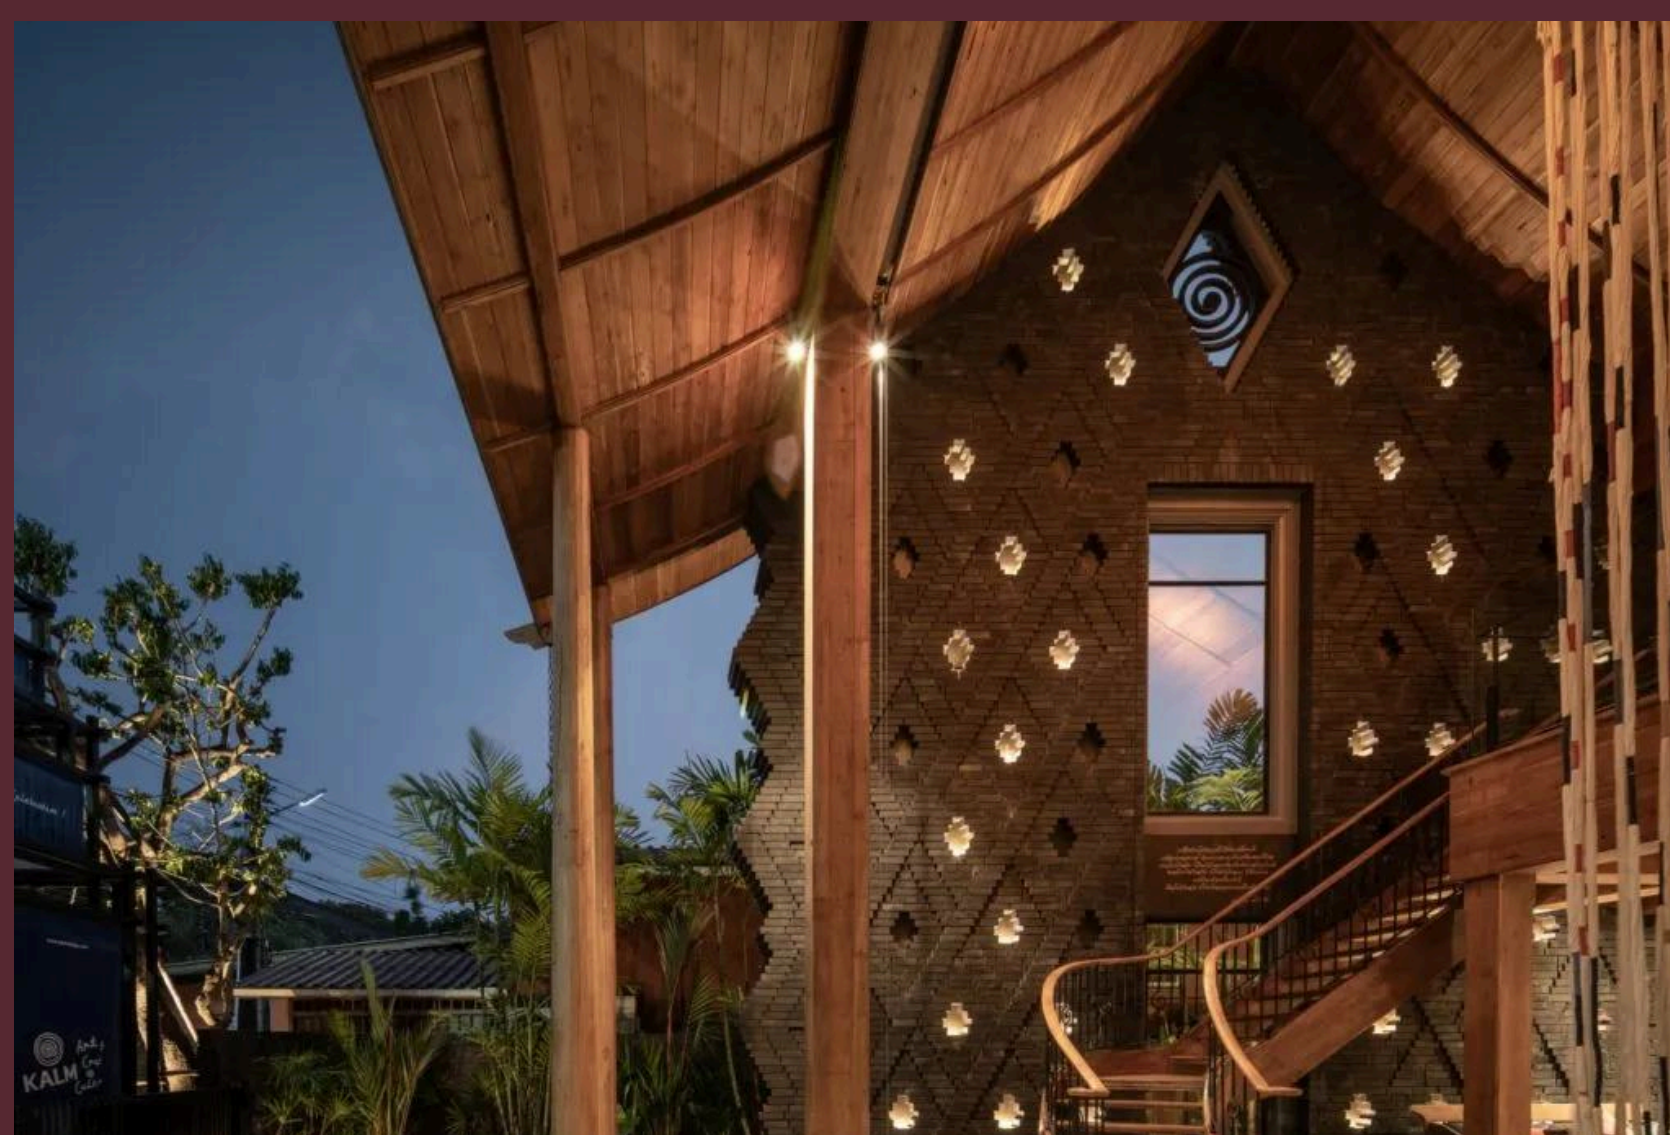

The Art of the Possible

Our standard collection is just the beginning. The true potential of our Northern Thai Teak is unlocked when your creative vision meets our expert craftsmanship. Below are examples of possibilities with our made-to-order service to inspire your next triumphant project.

Flooring & Decking Solutions

Whether for a luxurious interior or an inviting and serene outdoor oasis, we produce flooring and decking in custom widths and lengths. Explore high-class wooden materials for outstanding interior floors with tongue-and-groove features, custom anti-slip profiles for exteriors, or extra-wide planks for a deluxe appearance in all settings. (Price on Request)

Architectural & Finishing Elements

Create a show-stopping building facade with bespoke cladding, or complete your architectural pièce de résistance with custom skirting boards and mouldings in any profile. We provide the essential finishing touches that bring your design to perfection, ensuring every detail is exquisite. (Price on Request)

Custom Timber & Panels

For specially made furniture, countertops, or joinery, we supply precisely dimensioned S4S & Kiln-Dried timber. We also offer custom edge-glued panels which are engineered for large-scale applications like grand dining tables or bold and magnificent stair treads, providing a solid wood solution of unparalleled beauty and scale. (Price on Request)
